---

PROFESSIONAL SUMMARY

Software engineer with 7+ years shipping enterprise web applications at Dynatrace, CREALOGIX and T-Systems, now building complete products with LLM agents as the delivery team: versioned standing rules, MCP servers and project skills, per-task model routing, and every change gated behind CI. Currently building RAG-powered LLM chatbots. Open to remote roles.

PROFESSIONAL EXPERIENCE

AI Software Engineer | Fors Corp
Dec 2025 - Present | *Barcelona, Spain* | *Independent practice* | *Open to remote roles*
• Ship production-grade products end to end with an agent-driven workflow: 4,637 GitHub contributions in the past year; 89 pull requests (89 merged) across 8 repositories in the last 30 days.
• Currently building LLM chatbots with retrieval-augmented generation (RAG).
• Run Claude Code, Codex, Cursor and Grok against shared standing rules (CLAUDE.md, AGENTS.md, GROK.md), with MCP servers and repo-scoped skills.
• Route work by cost of being wrong: small models for mechanical sweeps, mid-tier for bounded implementation, top-tier for architecture, debugging and security review.
• Treat agent output as untrusted until proven: nine required status checks on main, CodeQL, dependency auditing and accessibility tests, with continuous releases through Changesets.

Software Engineer | Dynatrace
May 2022 - Nov 2025 | *Barcelona, Spain*
• Owned frontend features for Dynatrace Dashboards and Notebooks, moving from Angular into React and TypeScript, and built the shared library both products consumed.
• Led features from design through release; mentored new engineers, raised automated test coverage ~20% on a critical project and cut the integration-test suite to speed up Jenkins.

Software Engineer | CREALOGIX Group
May 2020 - May 2022 | Barcelona, Spain
• Enterprise Angular for retail and private banking products in Saudi Aramco's banking environment; reusable components inside a large shared framework, desktop and mobile.

Software Developer | T-Systems Iberia
Jun 2018 - Apr 2020 | Barcelona, Spain
• Java 7/8 services with Spring, Struts, REST APIs, Oracle and SQL Server for the Justice Department's judicial case-management system.

PROJECTS

Embedded RAG | *Python, React*: classic RAG chatbot that runs one pgvector search then one Claude answer on a dual Python + Vercel stack (MiniLM embeddings, cited answers or a fixed abstain).

Wordkeep | *React, TypeScript, Three.js, Hono, Claude API*: language app that teaches seven languages by playing, with a personal Wiktionary lexicon, Claude phrase breakdown, 3D atlas and on-device storage; App Store release pending.

Mensura | *Vite, React, TypeScript*: private on-device tracker with a self-made ML model that auto-learns from the user’s own logs, validates forecasts on held-out history, and keeps all data in the browser.

LMaaS | *Go, React*: self-hosted model service on Apple Silicon that serves local models over an OpenAI-compatible API and retrains ML models behind SemVer releases.

Forsight | *Go, React, TypeScript*: metrics agent with HTTP API, embedded dashboard, ML anomaly scoring, forecasts and optional LLM narrative; its component library ships as @fors-corp/forsight.

Fors Design System | *React, Radix UI, TypeScript*: brand tokens and 30 React components with dark/light theming, WCAG 2.1 AA, RTL and co-located accessibility tests.

SKILLS

- **AI and Agents:** Claude Code, Codex, Cursor, Grok, MCP servers, agent skills, prompt and context design, per-task model routing, local model serving, RAG, LLM chatbots
- **Frontend:** React, TypeScript, JavaScript, Next.js, Angular, Tailwind CSS, Radix UI, design systems, accessibility (WCAG 2.1 AA)

- **Backend and Systems:** Go, Python, Rust, Node.js, Java, Spring, REST APIs, SQLite, Prisma, Drizzle
- **Quality and Delivery:** Vitest, Playwright, React Testing Library, Storybook, GitHub Actions, CI/CD, CodeQL, Changesets, Jenkins
- **Languages:** Spanish, Catalan (native); English (proficient); Italian (intermediate); Portuguese (basic)

EDUCATION

Computer Engineering (coursework) | Universitat Oberta de Catalunya
2021 - 2022

Higher Technician in Multi-Platform Applications Development (CFGS - DAM) | Institut Joan d'Austria
2017 - 2019

Technician in Microcomputer Systems and Networks (CFGM - SMX) | Institut Escola del Treball
2015 - 2017
